

PROJECT: Factory, Rotherham

SCOPE OF WORKS: Repair & Upgrade 4No. High Speed Doors

Our client decided it was time to invest in upgrading their existing high speed doors with new replacement curtains.

The existing curtains had incurred damage over time and part of the clients project brief was to design & add replaceable wear strips to the new curtains, ensuring increased lifespan of the curtains and reduced long term repairs expenditure.

Replacement curtains included wind bars, lifting straps, buckles and webbing clamps.
