

PROJECT: Commercial Units, Wath-Upn Dearne, Rotherham

PRODUCT: 18No. Safeguard 76 Roller Shutters, Push Up/Pull Down, 2500mm(W) x 2500mm

The project brief was to provide security to each unit entrance on 18No. commercial units. As there was no electrical supply all shutters must be manually operated.

A&C Maintenance Ltd were awarded the contract for all of the roller shutters. Operation was by manual sprung balanced barrels, push up/pull down operation. Within the curtain were flush mounted lifting handle at chest height to help with opening & closing the shutters.

Due to the height being higher than a standard door opening a hook & pole was provided to help pull down each shutter. Locking is by means of a bullet lock & housing to each side guide with 2No. Keys per cylinder. All shutters were powder coat finished Blue RAL 5003.
