- ✓ Includes PP10 high security discus padlock

The anti ram raid post works with ease, and is hugely reliable. It comes as standard with black and yellow tape showing you have taken due care and attention to warn people you have a post in place. Ideal for those slightly tougher jobs protecting your perimeters and entrances.

An example installation completed by A&C Maintenance Ltd at Plumbase, Doncaster.

The anti ram post has a kick plate to ensure it stays in place whilst you secure the separate disk lock which inserts at the bottom of the post. This is cleverly designed so the shackle of the lock which is actually inside the post itself when fastened for extra security.

All our security posts are supplied with a PP10 high security padlock.
