

**PROJECT:** Waste Water Treatment Plant, Manchester

**PRODUCT:** Electric Safeguard 76 Roller Shutters, 2No. 3000mm(W) x 6000mm(H)  
2No. 400 x 4mm Black PVC Strip Curtains

The existing water treatment plant was upgraded to include a new sludge recycling facility, creating biogas for renewable electricity which is used to power plant on site and exported to the grid.

A&C Maintenance Ltd supplied & installed 2No. Safeguard 76 roller shutters to the incinerator sludge hoppers. The shutters were tall enough to allow the arctic lorries to tip the sludge into the hoppers.

Each shutter was mounted on the outside of the unit, fully enclosed from the elements with a hood, fascia and motor cover. Supplied with wind anchored guides and a 400x4mm black PVC strip curtain to hide the opening from view when the shutter is open.
