

PROJECT: Equestrian Centre, Retford
PRODUCT: Sliding Folding Shutter Doors

The project brief was to provide security doors to a new Equestrian Centre. Due to limited headroom available above the doorways, our Sliding Folding Shutter Doors were chosen for the project.

Our Engineers removed the existing block paving and cast in the new bottom tracks.

The Doors were supplied with a green powder coat finish. Galvanised pressed metals flashings powder coated to match the new doors were fixed to the door jambs. The flashings closed off the gaps between top of the walls and the door soffits.

Each door was provided with a mortice hook bolt lock for security.
