

PROJECT: Industrial Estate, Sheffield

DETAILS OF WORK: Replacement Security Gate & Fencing

The security gates to our clients industrial estate was ram raided. Badly damaging the pair of gates and adjoining palisade fencing. As well as damaging the gate leaves, the force of the impact had weakened the foundations of the gate posts.

Due to the estate being exposed to further criminal activity. Our client required a replacement gate and fencing urgently. Our factory was able to fast track manufacture a new pair of gate leaves and posts. A&C engineers dug out the damaged gates and palisade fencing.

We upgraded the gate leaves and posts with more heavier duty steel box sections. The steel was powder coated including the palisade fencing to match to match the existing.

Another upgrade to the gate was improve the locking by manufacturing a more heavier duty slide bolt with a shroud to protect the padlock.

A&C engineers cast in the new gate posts and installed the new gate leaves, palisade fencing within 2 working days.
