

**PROJECT:** Refurbishment Of Distribution Centre, Lancashire (Phase 1)  
**PRODUCTS:** Refurbishment of 22no Loading Bay Doors  
Supply of 22no New Dock Shelters, Pairs of Dock Buffers, Traffic Lights

The project was to refurbish an old distribution centre following the purchase by a new client. The distribution centre is compiled of various large units upon an industrial estate. The work was carried out in 3no phases.

Phase 1 involved the refurbishment of 22no loading bays . The existing loading bay doors were completely stripped of their damaged/worn panels and replaced with new door panels. External silver stucco finish with a row of vision panels.

The existing dock shelters were too badly worn and damaged to refurbish. A&C dismantled the existing shelters and replaced with 22no new dock shelters, 22no new pairs of dock buffers and 22no new traffic light systems.
